| Catalog Description | 72700D1 Field bus card (FBC) system 95 for Systevo Control |
| Long Description | Plug-in board for the upstream Systevo Control to manage a maximum of 40 (50) active system components in the data bus, such as room terminals, room electronic modules, interface units and other units. The data bus of a field bus card can be segmented into up to six sub-groups. There is an option to feed in the Ward Management Controller's redundant power supply via a decentralized power supply installed in the ward or living area. An additional data amplifier (data / audio) is required after 400 m. It is prepared for future device functionality subject to license to enable the use of additional service features. Compatibility checks must be conducted on existing system installations. |
