Certificazioni e Omologazioni

Marcatura N di AENOR. Passerelle e Supporti

reji band® e **pemsaband®** hanno ottenuto la marcatura N di AENOR che certifica il superamento dei requisiti della norma europea, UNE- EN-61537, "Sistema di passerelle per la distribuzione dei cavi", dove si specificano le condizioni di sicurezza, prove, caratteristiche tecniche, etc., con cui deve essere prodotta la passerella.

Certificato N:

reji band® **pemsaband®** **Soportes**
030/002090 030/002096 030/002089

Certifications and Approvals

AENOR N mark. Trays and supports

reji band® and **pemsaband®** are the only metal trays on the market that have achieved the N mark of AENOR. This certifies that the N marked **reji band®** and **pemsaband®** have exceeded the requirements of European standard EN-61537, "Cable Management - Cable Tray Systems and Cable Ladder Systems" which specifies the security, testing, technical features, etc., which the trays must meet.

N Certificate:

reji band® **pemsaband®** **Supports**
030/002090 030/002096 030/002089

Certificats et Homologations

Marque N d'AENOR. Calhas e Suportes

reji band® et **pemsaband®** sont les seuls chemins de câbles métalliques du marché à avoir obtenu le marquage N d' AENOR. Ce marquage certifie que **reji band®** et **pemsaband®** sont conformes aux exigences de la norme européenne NF-EN-61537 : « Systèmes de chemin de câbles et systèmes d'échelle à câbles pour conduits de câblages », où sont définies les conditions de sécurité, les essais, les caractéristiques techniques, etc ; auxquels doivent s'adapter les chemins de câbles.

Certificat N:

reji band® **pemsaband®** **Supports**
030/002090 030/002096 030/002089

E90. Resistenza al Fuoco

Le passerelle metalliche **reji band®** e **pemsaband®** hanno superato il test standard Tedesco DIN 4102-12, che verifica il comportamento al fuoco dei materiali da installazione, resistenza al fuoco dei sistemi di cavi elettrici necessari per mantenere l'integrità del circuito", per sopportare 1000°C di temperatura per 90 minuti, ottenendo la certificazione E90.

E90. Fire resistance

reji band® and **pemsaband®** have successfully exceeded the fire resistance tests defined by the German Standard DIN 4102-12 "Fire behaviour of building materials and elements, Fire resistance of electric cable systems required to maintain circuit integrity", by withstanding 1000°C (1832°F) temperature for 90 minutes, thus obtaining the E90 certification.

E90. Résistance au feu

Le chemin de câbles **reji band®** et **pemsaband®**, a réussi le test de la norme allemande DIN 4102-12 qui teste l'ensemble de l'installation électrique, chemins de câbles inclus, certifiant que le courant électrique de l'installation est maintenues pendant 90 minutes à plus de 1000°C.

Certificazione UL. Continuità elettrica garantita

Questa certificazione attesta che la passerella **reji band®** assicura buona continuità tra le passerelle e che esse possano essere utilizzate, in determinate condizioni, come funzione di terra senza conduttore di protezione aggiuntiva.

UL Classified. Electrical Continuity guaranteed

This certification ensures, when using **reji band®** wire mesh tray, that the correct electrical continuity between trays exists which could, under certain circumstances, be used as a protective earth without using any additional protective conductor. Any protective conductor would connect all earthed points of an installation to the earth conductor, in order to eliminate the risks through indirect contact.

Certification UL. Continuité électrique assurée

Cette certification garantit que le chemin de câbles **reji band®** et **pemsaband®**, assure une bonne continuité entre les différentes sections et que celles-ci pourraient être utilisées dans des conditions déterminées comme fonction de branchement à la terre, sans rajouter un conducteur supplémentaire de protection.

Finitura BYCRO in accordo con RoHS 2002/95/CE

E' stato eliminato il Cromo esavalente e metalli pesanti nel processo di produzione, fabbricando la passerella **reji band®** con finitura BYCRO secondo le ultime direttive ambientali.

BYCRO finish in compliance with RoHS 2002/95/EC

Pemsa has removed all hexavalent chromium and heavy metals from their production processes, ensuring that their BYCRO **reji band®** finish complies with all of the latest environmental directives.

Finition BYCRO conforme à la norme RoHS 2002/95/CE

Pemsa a éliminé le Chrome Hexavalent de ses procédés de production, et fabrique désormais son chemin de câbles **reji band®** finition BYCRO conformément aux dernières Directives Environnementales.

1 Dati ottenuti secondo la norma UNE-EN 61537 con un coefficiente di sicurezza del 170% senza raggiungere il punto di collasso. Sono garantiti solo con il nostro gancio e i supporti rinforzati con rinforzo strutturale.

Values obtained from test according to the IEC-61537 with a safety coefficient of 170% without ever reaching the collapse point. Guaranteed only for our hanger with security plug and supports reinforced.

Valeurs obtenues, selon la norme IEC-61537, avec un coefficient de sécurité de 170% sans aucun affaissement. Garantie uniquement par nos support Omega, avec top de sécurité. Support renforcé à renfort structuré.

2 Dati ottenuti secondo la norma UNE-EN 61537 (sezione H) relativi all'installazione in sicurezza della passerella con supporti orizzontali.

Values obtained in accordance with International Standard UNE-EN 61537 (Section H) relating to the information for safe installation of trays with horizontal supports.

* Bending moment 1: Resulting bending moment on ceiling plane.

** Bending moment 2: Resulting bending moment from cantilever bracket.

Valeurs obtenues selon la norme UNE-EN 61537 (Annexe H) sur les informations pour une installation fiable des éléments descendants avec supports horizontaux.
