

1. USE

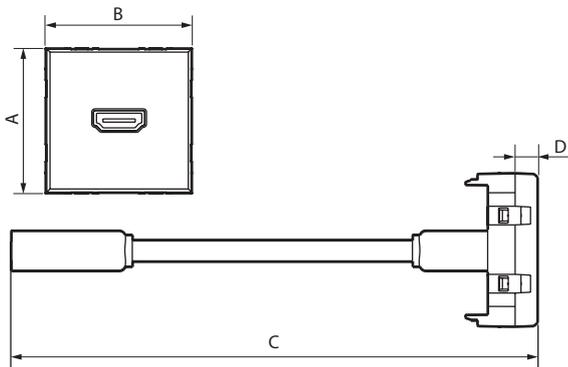

Used to transmit HD and HDU High Definition digital audio-video streams between a source (DVD or Blu-Ray player, games console, computer, etc) and a compatible receiver (TV, video projector, etc).
To ensure a high-quality result, the connection between the two devices must not exceed a certain distance (see audio-video characteristics in section 5.3). For longer connections, it is necessary to provide a booster system in the installation.
Clip fixing.
For installation in a flush-mounting box, depth 50 mm recommended.
