	3	NO	OK	OK	OK

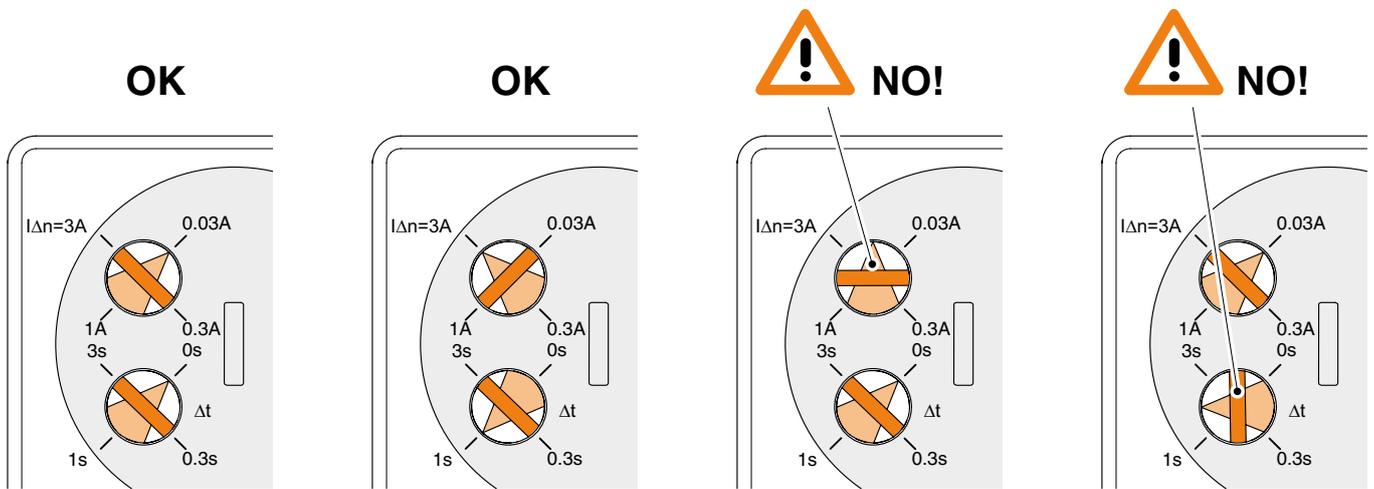

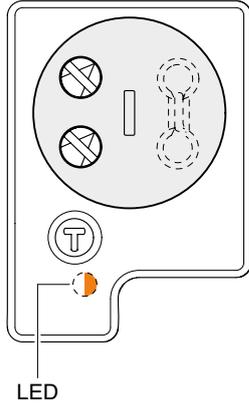

Nell'effettuare la selezione dei tempi o delle soglie, se si posiziona il selettore in una regione intermedia tra due soglie, o tra due tempi, si ha che il Led Verde lampeggia (pertanto le segnalazioni riportate nella tabella sopra sono disabilitate) e vengono impostati automaticamente, dopo circa 5 secondi, soglia 30mA e tempo istantaneo.

Lors de la sélection des temps ou des seuils, si le sélecteur est placé dans une zone intermédiaire entre deux seuils ou entre deux temps, la LED verte se met à clignoter (les indications reportées dans le tableau ci-dessus sont alors désactivées) et, après 5 secondes environ, un seuil de 30 mA et un temps instantané sont automatiquement définis.

If the selector is settled between two limits or two times, green led blinks (all the signals are disabled and, 30mA limit/ instantaneous time delay are automatically settled after 5 seconds).

Seçici iki limit veya iki zaman değeri arasında bırakılırsa yeşil led yanıp sönmeye başlar. (bütün diğer uyarılar devre dışı kalır ve 5 saniye içinde otomatik olarak 30mA limit ile anlık açma ayarına geçer).

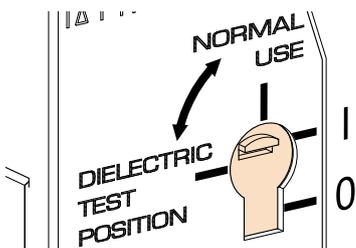

Led Bicolore / LED bicolore / Double color led / Çift renkli Led		
Segnalazione / Indication / Signal / Sinyal	Eventi / Événements / Event / Olay	Priorità / Priorité / Priority / Öncelik
Led Verde acceso LED verte allumée Green led on Yeşil Led sabit yanıyor	IΔn sotto soglia IΔn en-dessous du seuil IΔn under limit IΔn limitin altında	3
Led Verde lampeggiante LED verte clignotante Green led blinking Yeşil Led yanıp sönüyor	Regolazione non corretta - Regolazione in corso Réglage incorrect - Réglage en cours Setting mistake - Setting in process Ayarlama hatası - Ayarlama yapılıyor	3
Led Rosso acceso LED rouge allumée Red led on Kırmızı Led sabit yanıyor	IΔn superiore al 45% della soglia imposta IΔn supérieur à 45% du seuil défini IΔn higher than 45% of settled limit IΔn ayarlanan limit değerinin %45'inin üzerinde	3
Led Rosso lampeggiante LED rouge clignotante Red led blinking Kırmızı Led yanıp sönüyor	IΔn superiore al 60% della soglia imposta IΔn supérieur à 60% du seuil défini IΔn higher than 60% of settled limit IΔn ayarlanan limit değerinin %60'ının üzerinde	3
Led Verde e Led Rosso lampeggianti alternativamente LED verte et rouge en clignotement alterné Green and Red alternately blinking Yeşil ve Kırmızı Ledler sırayla yanıp sönüyor	Temperatura > 85°C Température > 85°C Temperature > 85°C Sıcaklık > 85° C	1

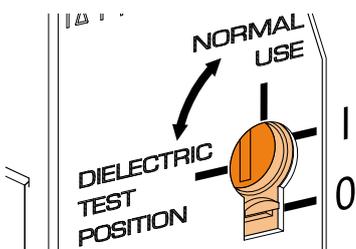

Se più eventi fossero concomitanti, la segnalazione visualizzata sarà quella a priorità più elevata. La priorità maggiore è la 1  
En cas de plusieurs événements simultanés, celui dont la priorité est la plus élevée sera signalé. Le niveau 1 de priorité est le plus élevé.  
If more events were at the same time, the signal would be the one with highest priority. The highest priority is 1  
Aynı anda birden fazla olay söz konusu ise öncelikli olay gösterilir. En yüksek öncelik değeri 1'dir.
