#### 1. DESCRIPTION AND APPLICATIONS

Straight fixed male connector with plastic thread made of high quality, halogen free and flame retardant polyamide. Suitable for most applications combined with PCV conduits, it ensures the protection of cables and connections with good mechanical and thermal performances and good resistance to vibration and traction. It's ideal for generic environments both in static and dynamic applications.

### 2. DIMENSIONS AND COMPATIBILITY

### Dimensions and packaging:

In according to UNI ISO 228/1

**NOTE:** recommended minimum conduit thickness ÷ 2 mm

## Compatibility:

Conduits: GE PVC, FX, FP and FP2000 series

### 3. TECHNICAL FEATURES

#### Raw material:

Polyamide PA6 [UL94-V2] flame retardant.

**La legrand** 

## **UNIVERSALE** connectors

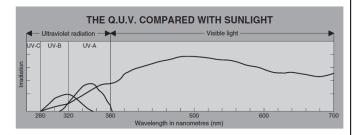

### ONIVERSALE CONNECTO

Item codes : from 382900 to 382918 and from 3829020 to 382999

### Plastic thread

#### Resistance to UV rays:

Represents the resistance to the degradation of mechanical performance caused by exposure to UV radiation contained in sunlight. All RTA systems have been subjected to the Q.U.V. test which, with exposure cycles of 4+4 hours, simulates the continued alternation of light and condensation. The connectors of UNIVERSALE series are not recommended for long exposition to UV radiation even if they have a good resistance to UV rays: all UNIVERSALE connectors are indicated for internal uses or covered uses.

### Operating temperature:

Minimum: -20° C / -4° F Maximum: +80° C / +176° F

#### Heat resistance:

Glow wire test: 850° C / +1562° F

#### Self-extinguishing:

Does not propagate flames in according to IEC 61386

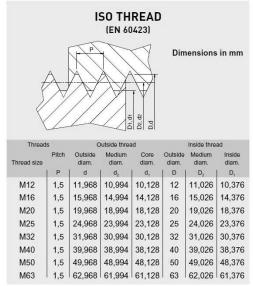

#### IP protection index:

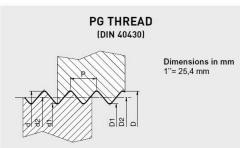

IP65 with GE PVC series conduits.
IP44 with FX, FP and FP2000 series conduits
