L'ensemble de l'installation d'Éclairage de Sécurité doit faire l'objet d'un entretien régulier et d'essais périodiques, conformément au règlement de sécurité. Dans le cadre de l'entretien des appareils, nous conseillons le nettoyage régulier de la vasque et du réflecteur.
« Les Déchets d'Equipements Electriques et Electroniques professionnels (DEEE pro) ainsi que les accumulateurs au Nickel-Cadmium, au plomb ou au Nickel-métalhydrure qui peuvent équiper ces produits, sont néfastes pour l'environnement et la santé humaine ». Ils doivent être collectés sélectivement, traités et recyclés. La collecte, le traitement et le recyclage des DEEE Pro et accumulateurs incorporés, de Cooper Sécurité SAS (Groupe EATON), sont assurés gratuitement par Récylum.
