

COPERCHIO BANCO CONSOLE, 1000

CATALOG NUMBER

MPLS102

Un coperchio in acciaio inossidabile per un pulpito in lamiera d'acciaio è un'alternativa economica a un pulpito in acciaio inossidabile completo in determinati ambienti. Ad esempio, un coperchio in lamiera d'acciaio si deteriorerebbe rapidamente se gli operatori fossero esposti ad agenti chimici e li trasferissero su di esso durante gli interventi e la manutenzione.

FEATURES

Descrizione: Per la sostituzione di coperchi standard su unità pulpito MPC(S) o MPG(S) dove è necessaria inalterabilità o resistenza alla corrosione.

Materiale: Acciaio inox pre-satinato AISI 304 da 2 mm.

Finitura: Acciaio inox pre satinato 400.

This is especially important in industries where the operators are exposed to chemical agents and may transfer them onto the desk during operation

To be used with MPCxx2 and MPG consoles only

For replacing the standard lid on MPC desk units or MPG consoles where high corrosion resistance is required

PRODUCT ATTRIBUTES

Height: 47 mm

Width: 1000 mm

Depth: 500 mm

Material: Stainless Steel 304

Finish: Brushed

Color: Unpainted

Thickness: 2 mm
