

## SylSmart Connected Industry Gateways

### *SylSmart SSE Energy Manager OP*

#### 9010970

#### Caratteristiche prodotto

- The SylSmart Connected Industry Energy Manager OP is an on-premise server which gathers, stores, analyses, and provides visual reporting of sensor data. In addition to being the collection point for energy, occupancy, and environmental data captured by the SSE Smart Sensors, the Energy Manager provides a web-based user interface for lighting system management and optimizing building system performance. The EM configures and manages lighting behaviour by adjusting software profiles while retaining lighting data for up to 36 months. Generates reports on lamp and fixture outages, carbon reduction, energy and financial savings. The Energy Manager (EM OP) manages up to 1500 individual sensors offering an in-depth insight into how the building is performing.

## PANORAMICA DEL PRODOTTO

Nome prodotto	SylSmart SSE Energy Manager OP
Tecnologia	SylSmart
General application	Logistics & Industry
Garanzia	5 years

## TABELLA DATI

### Dati generali

Nome prodotto	SylSmart SSE Energy Manager OP
Tecnologia	SylSmart
General application	Logistics & Industry
Garanzia	5 years
