

SylSmart Connected Industry Gateways

SylSmart SSE Gateway-01

9010971

Caratteristiche prodotto

- The SSE Gateway aggregates wireless traffic between the SylSmart Connected Industry Smart Sensors and the Energy Manager appliance/Energy Manager EMC. Each Gateway sends and receives data for up to 100 individual sensors. It uses the IEEE 802.15.4 protocol for wireless communication with the sensors and a wired TCP/IP network for communication with the Energy Manager. AES 128-bit encryption for wireless data transmission and SSL encryption for TCP/IP data transmission enabled for data security. Each Gateway can operate at 150 ft. radius (46m) open range in open ceiling installation and individual sensor units can function as repeaters to extend operating range.

PANORAMICA DEL PRODOTTO

Nome prodotto	SylSmart SSE Gateway-01
Tecnologia	SylSmart
General application	Logistics & Industry
Garanzia	5 years
