

## SylSmart Connected Industry Switches

*SylSmart SSE Wall Switch-01*

9010974

### Caratteristiche prodotto

- The SylSmart SSE Wall Switch is designed to control luminaires in your SylSmart Connected Industry solution. It provides all of the functions of a standard wall switch with preset dimming capabilities and without any additional wiring. Enables you to select preset scenes so that groups of light fixtures behave in concert to achieve a lighting objective. The wall switch gives you the flexibility to predefine up to six different scenes and many combinations of light levels that can then be accessed at the push of a button. Low Air-Time Consumption. The SylSmart SSE Wall Switch comes complete with a long life battery offering ultimate flexibility with an estimated life of up to 7 years. Consumes a very small fraction of wireless channel capacity because it only communicates locally with the SylSmart SSE Smart Sensors in data bursts, thereby minimizing collisions with other traffic.

## PANORAMICA DEL PRODOTTO

Nome prodotto	SylSmart SSE Wall Switch-01
Tecnologia	SylSmart
General application	Logistics & Industry
Garanzia	5 years

## TABELLA DATI

### Dati generali
