

**TECHNICAL DATA SHEET**

# GREASE SPRAY

## WITH P.T.F.E.

**Characteristics**

Base:	Silicone grease with PTFE
Temperature of application:	-30 °C / + 220 °C (approximately)
Appearance:	translucent grease
Propellant:	Denatured and odourless hydrocarbon
Solvents Free, CFC free, Not Toxic	

**Properties:**

- It is a good penetrating grease
- High resistance to traction
- It prevents overheating and abrasion of the parts in contacts.
- Dielectric, isolating, protective.
- Water repellent (It can be used to lubricate underwater equipments)
- It contains PTFE that is a very good lubricant and penetrating agent.

**Description**

ELEMATIC GREASE SPRAY is used for general lubrication purposes.

It is used in mechanic industry especially to lubricate all mechanic parts where a good lubricant as silicone added with PTFE, is necessary.

Lubricant for chains and gear wheels, ball bearings and any other mechanic movement.

**Instructions of use**

Spray the product from 30 cm distance.

**Packaging**

Spray Aerosol ml 400

Box 25 Aerosol

Product Code **8242001**

**Head office**
