

# CNC 120 T

## LL131100S3

# Lombardo.

### Informazioni tecniche:

|                             |                                                            |
|-----------------------------|------------------------------------------------------------|
| Installazione:              | Incasso terra                                              |
| Materiale Corpo:            | Alluminio                                                  |
| Finitura:                   | Inox Spazzolato                                            |
| Tipo di diffusore:          | Vetro serigrafato                                          |
| Inclinazione ottica:        | Spot-25°                                                   |
| Tipo lampada:               | LED                                                        |
| Temperatura colore:         | 3000K                                                      |
| CRI:                        | >80                                                        |
| LB Factor:                  | L80B20 - 50.000h                                           |
| Rischio fotobiologico:      | RG0                                                        |
| Potenza assorbita Watt:     | 9                                                          |
| Lumen:                      | 1000                                                       |
| Real Lumen:                 | 750                                                        |
| Alimentazione:              | ⊗ esclusa                                                  |
| LED:                        | 12/24V                                                     |
| Classe di isolamento:       | ⬡ CL.III                                                   |
| Cavo Alimentazione:         | 1,50 metri H05RN-F<br>2x0,75                               |
| Grado di protezione:        | <b>IP 67</b>                                               |
| Resistenza alla rottura:    | <b>IK 10 20J xx9</b>                                       |
| Marchi di Conformità:       | CE UK                                                      |
| Caratteristiche aggiuntive: | ⬇Ⓢ 2000 <sup>KG</sup> <sub>MAX</sub> ⬆ 60°C <sub>MAX</sub> |
