

specifications

The FiberRunner® Channels shall provide robust pathway options for routing fiber optic and high-performance copper cable within various applications. The channels shall facilitate easy installations with its mating components including FiberRunner Couplers and Fittings. The FiberRunner Channels shall have optional hinged covers and a split cover to add an additional layer of protection when necessary.

The channels shall be available in 10 feet (3 meter) length. The longer length channels shall provide many advantages to the overall system solution. This shall allow for a seamless transition between pathway solutions of the same length where supports can easily be added. Shorter lengths will also require more joiners or couplers; but the FiberRunner channels longer lengths shall require little to no additional joiners or couplers. Using the FiberRunner Channels result in time and labor savings while protecting cable across various lengths and applications.

Dimensions are in inches. [Dimensions in brackets are metric].

technical information

| | |
|----------------------|---|
| Material: | PVC |
| Flammability: | 94 V-0 |
| Approvals: | UL Listed to 2024 Optical fiber Cable routing assemblies compliant with the applicable tests in Telcordia GR-63-CORE Network Equipment Building Systems Level 3 |

key features and benefits

| | |
|---------------------------------|---|
| Robust Channel Fittings: | Holds and protects cables with a design that allows for easy installation of covers, fittings, and QuikLock™ Brackets. |
| Longer Lengths: | 10 feet (3 meter) length allows users to easily add support when additional secondary pathway is required. With longer lengths, customers save in labor and time due to less need for installing additional components. |
