

Wall Mount Phone Plate

specifications

Wall phone plate shall be made of stainless-steel construction and shall include mounting studs positioned to mount standard wall mount telephones flush to the wall. Phone plate shall accept wall mountable phones with short patch cord connections to jack module. Faceplate shall be available empty or kitted with Category 5e or Category 6 Keystone TP-style jack modules.

technical information

Packaging:	Wall plate, 2- mounting screws, 1- keystone jack module in kits only
Category 5e:	Exceeds channel requirements of ANSI/TIA-568-C.2 Category 5e and ISO 11801 Class D standards at swept frequencies 1 to 100 MHz
Category 6:	Exceeds channel requirements of ANSI/TIA-568-C.2 Category 6 and ISO 110801 Class E standards at swept frequencies 1 to 250 MHz
Material:	20 AWG 430 stainless steel construction

key features and benefits

Utilizes enhanced Giga-TX Technology	Optimizes performance by eliminating conductor untwist and reduces installation time and expense
Improved termination cap	Conductor retention slots simplify jack module termination
Keystone opening	Empty faceplate will accept standard keystone modules

applications

Wall phone plate accepts standard wall mount phones that use short patch cord connections to the module located on the faceplate. Design allows phones to mount flush to the wall. Phone plate is available kitted with Keystone Category 5e or Keystone Category 6 jack module as well as empty for those who need Category 6A performance where NK6X88MBL module is recommended.

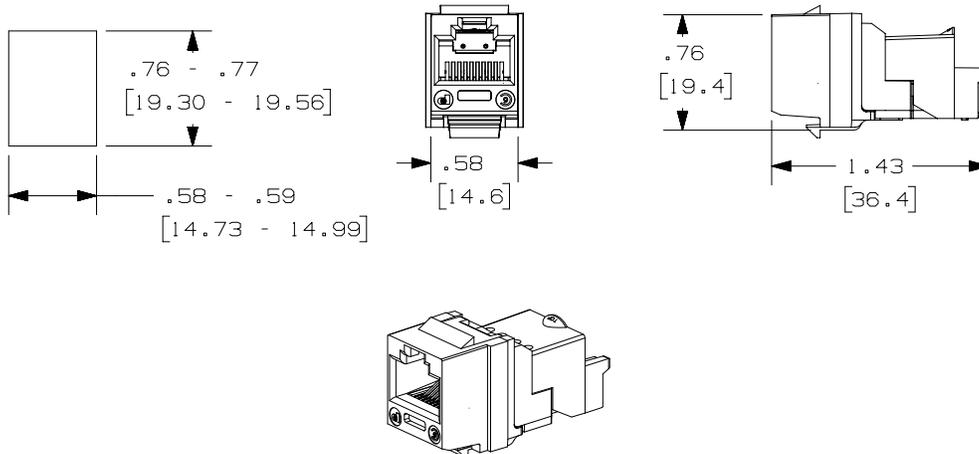

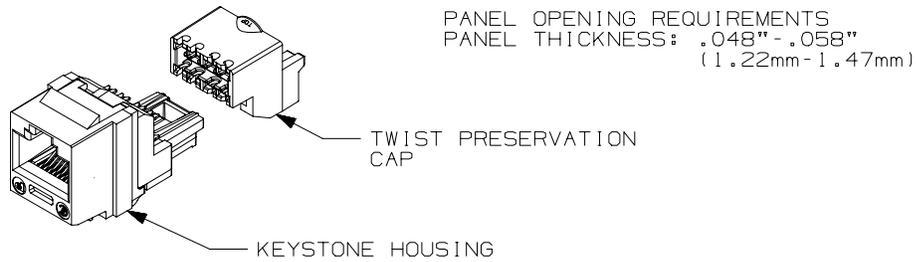

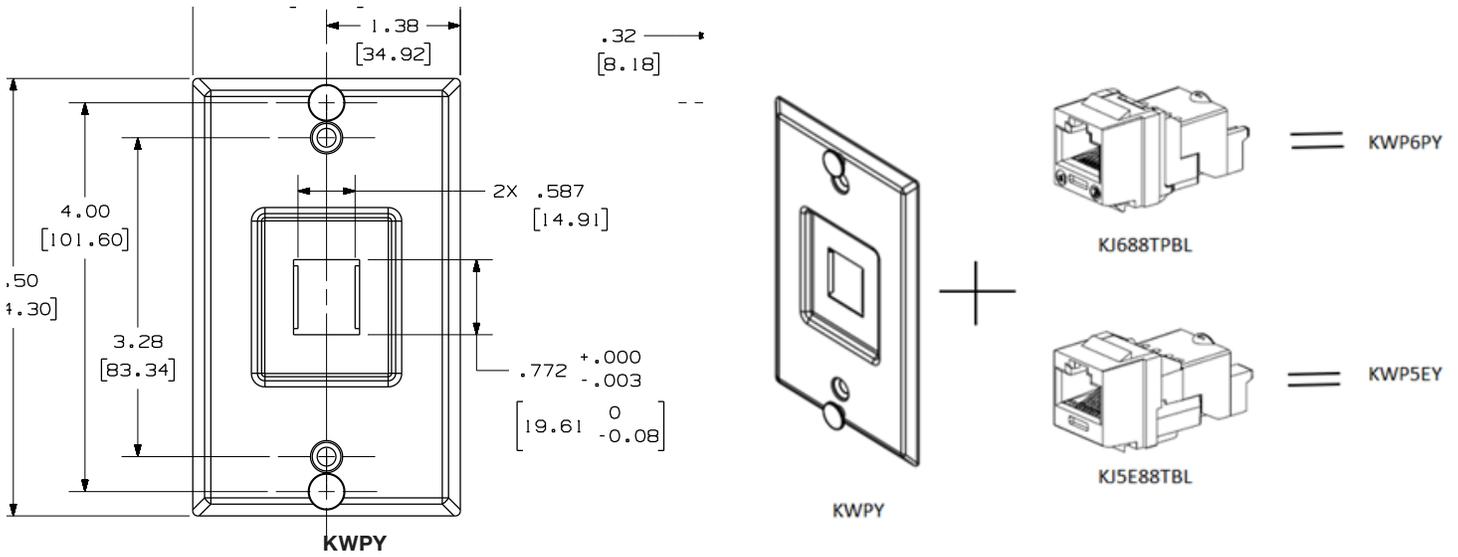

Wall Phone Plates

Empty phone plate:	KWPY
Category 5e phone kit:	KWP5EY
Category 6 phone kit:	KWP6PY

Keystone Jack Modules

Category 6A:	NK6X88MBL
Category 6:	KJ688TPBL, NKP5E88MBL
Category 5e:	KJ5E88TBL, NK688MBL
