

RJ45 Blockout Devices

specifications

The RJ45 jack blockout device shall be compatible with most RJ45 openings to protect and prevent unauthorized access to the network. The device shall snap and lock securely into RJ45 openings and shall only be released with removal tool without interfering with adjacent jacks or hardware. The device shall be utilized in any data application that requires RJ45 type connection. The RJ45 blockout device shall be available in various color options to enable color identification.

technical information

Material:	Polycarbonate
Temperature range:	-30°F (-35°C) to 200°F (93°C)
RoHS compliant:	Yes
Halogen free:	Yes
Packaging:	Each package includes 10 devices and one key Bulk packages (-C) include 100 devices and five keys

key features and benefits

Tamper resistant	Device blocks unauthorized access to jacks and potentially harmful foreign objects, saving time and money associated with data security breaches, network downtime, repair and hardware replacement
TIA/EIA-604 FOCIS-3 compliant (or compatible)	Device fits all RJ45 receptacles to accommodate all retrofit applications and new installations
Versatile functionality	Compatible with most RJ45 jacks to accommodate a variety of applications without interference with jack contacts
Compact, low profile design	Can be installed without interfering with adjacent jacks, plugs or connectors, even in high-density applications
Removal tool	Device may only be released with the special removal tool, ensuring the safety and security of your network infrastructure
Color assortment	Enables color-coding for visual identification or aesthetics

applications

The RJ45 blockout device is designed to protect network integrity and prevent unauthorized access to the network by securing the RJ45 opening. The device saves time and money associated with downtime, data security breaches,

hardware replacement and infrastructure repair. The RJ45 blockout device snaps into the RJ45 opening and can only be released by the removal tool. This ensures safety and security of the network infrastructure.
