

Strain Relief Bars

PANDUIT®

SPECIFICATION SHEET

specifications

Strain relief bars shall consist of a metal bar that mounts to the rear of a standard EIA 19" rack to support a minimum of 24 cables exiting from the back of a patch panel. Cables shall be secured with integrated adjustable clips or hook and loop strips. Optional quick release brackets shall provide an easy way to remove the strain relief bar without the use of tools.

technical information

Mounting options:	All strain relief bars mount to standard EA 19" racks, or a standard 23" rack using an optional extender bracket
Packaging:	#12-24 screws included SRBS19BL-XY includes 10 bars per package

key features and benefits

Optional quick release brackets:	Enables strain relief bars to be removed and re-installed without the use of tools
Deep strain relief bars:	Offer additional cable support and management, ideal for heavier cables; extend 5"-7"
Quick removal:	Select bars can be easily removed for easier access to connections
SRBWCY Integrated adjustable clips:	12 clips provide enhanced cable management; organize cables individually for optimum finished appearance; accommodates multiple sizes and shapes of copper, fiber and coaxial cables for a wide variety of applications (cable diameter: 0.17"-0.33", 4.3mm-8.4mm); includes easy-release mounting feature
SRBM19BLY Built-in cascade:	Provides a smooth contoured surface for cable routing and provides bend radius control to help maintain network integrity; includes easy-release mounting feature
Raised tie mounts:	Allows cables to be secured together with six enclosed ties

applications

Strain relief bars are used to support and manage cables in telecommunication rooms. Panduit offers a full line of strain relief bars to fit a variety of applications, offering end users the flexibility, convenience, and ability to support up to 72 cables. Strain relief bars can be used with standard 19" rack mountable patch panels and can also be mounted to 23" racks using optional extender brackets.

Each bar occupies 1/3 to 2/3 of a rack space. Multi-depth bars are designed for installations that require additional features to support, organize, and secure heavier cables. Optional quick release brackets mount to a rack or behind a patch panel allowing the strain relief bar to be removed quickly.

Strain Relief Bars with Cable Management and Easy Release Features

With clips: SRBWCY

With integrated tie mounts: SRBM19BLY

Strain Relief Bars

Straight: SRBS19BL-XY

2" offset: SRB19BLY

5" offset (inward mounting*): SRB19D5BL

7" offset (inward mounting*): SRB19D7BL

7" offset multi-depth: SRB19MDBL

Quick Release Brackets

Set of two: SRBBRKT

Patch Panels

Strain relief bars are compatible with all patch panels. See www.panduit.com for the complete selection.

Tak-Ty® Hook & Loop Cable Strip Tie

15'L (4.6m), .75"W (19.1mm): HLS-15R0

Ultra-Cinch™ Hook & Loop Ties

3" (76mm) max. bundle diameter: UCT3S-X0

Optional Extender Brackets

1 RU: PEB1

2 RU: PEB2

*Bars with inward mounting feature require 19.75" clearance between rails or cabinet walls.
