

Fiber Optic Cabling Infrastructure Offering

PANDUIT[®]
infrastructure for a connected world

High-Speed Fiber Cabling Systems

Offers a high bandwidth and mission-critical physical infrastructures in data center, enterprise, industrial and campus networks with comprehensive fiber optic systems that deliver high performance, reliability, and scalability. The deployment of high-speed cabling systems has been increasing rapidly as data centers enable their physical infrastructure with 10 and 40 Gb/s capacity to support server virtualization, I/O consolidation, and convergence of backbone applications.

Structured Cabling Infrastructure

A properly designed and implemented cabling infrastructure is a fundamental asset of every business. Carefully planning a structured cabling solution facilitates the delivery of new services, lowers network maintenance costs, and increases productivity. New high-bandwidth applications enable organizations to better fulfill their need for productivity and innovation in a rapidly changing world.

Innovative Data Center Infrastructure Solutions

A comprehensive, intelligent data center offering that supports best practice methodologies. Our data center solutions enable physical to logical architecture integration, and deliver robust, scalable physical infrastructures that address:

- Visibility and control for managing and automating real-time data processes and documentation
- Convergence of new technologies and high-speed data applications
- Operational efficiency through process improvement and IT initiatives, such as cooling conservation through energy efficient data cabinets
- Capacity management for greater real estate utilization
- Modular pods designed to support high-density applications and provide consistent, reliable deployments while lowering infrastructure risk and costs

These fiber solutions facilitate faster implementation and simple specification, streamlining the process of designing, specifying, installing, and managing the increasingly complex physical infrastructure necessary to optimize your data center. Panduit knows the data center space intimately. We help you discover tangible infrastructure and business process improvements that increase functionality, interoperability, and manageability of mission-critical operations across your entire organization.

PanNet™ System Warranty

All channels are field tested by Panduit Certified Installers (PCI) using industry standard hand-held devices which provide verified network performance, and ensures your network operates at optimal performance.

Cable Fire Ratings Reference Guide

Cable fire ratings need to be considered when specifying cabling infrastructure to ensure local building codes are met. The below rating guide provides the information needed to determine which rating is appropriate for different installation environments.

Plenum Rated Cable, Non-Conductive (OFNP)

A Plenum Rating (OFNP) signifies cable that has passed stringent burn testing and is suitable for installation into air plenum spaces. OFNP cables have fire-resistance and low smoke production characteristics. They are typically made with PVC sheathing and can be installed in ducts, plenums, and other spaces used for building airflow. This is the highest fire rating for North America fiber cable, and no other cable types can be used as substitutes.

Plenum Rated Cable, Conductive (OFCP)

A Plenum Rating (OFCP) differs from OFNP in that the cable contains metallic elements, typically armor, and therefore, conducts electricity. All other aspects of this rating are the same as OFNP.

Riser Rated Cable, Non-Conductive (OFNR)

A Riser Rating (OFNR) is commonly required when cables are run between floors through open vertical shafts. OFNR cables are used in Riser areas which are building vertical shafts or runs from one floor to another floor. OFNR cables cannot be installed in plenum areas since they do not have the required smoke rating as plenum rated cables. OFNP plenum cables can be used as substitutes for OFNR Riser cables.

Riser Rated Cable, Conductive (OFCR)

A Riser Rating (OFCR) differs from OFNR in that the cable contains metallic elements, such as a layer of armor, and therefore, conducts electricity. All other aspects of this rating are the same as OFNR.

Low Smoke Zero Halogen (LSZH)

A Low Smoke Zero Halogen Rating (LSZH) is sometimes referred to as low toxicity cable. When burned, PVC-based cables produce a cloud of toxic smoke containing corrosive compounds. LSZH cables do not contain the halogen type compounds that form these toxic substances. LSZH ratings are expressed as OFN-LS or OFNR-LS if the cable also meets the requirements of OFNR rated cable.

EuroClass and UKCA

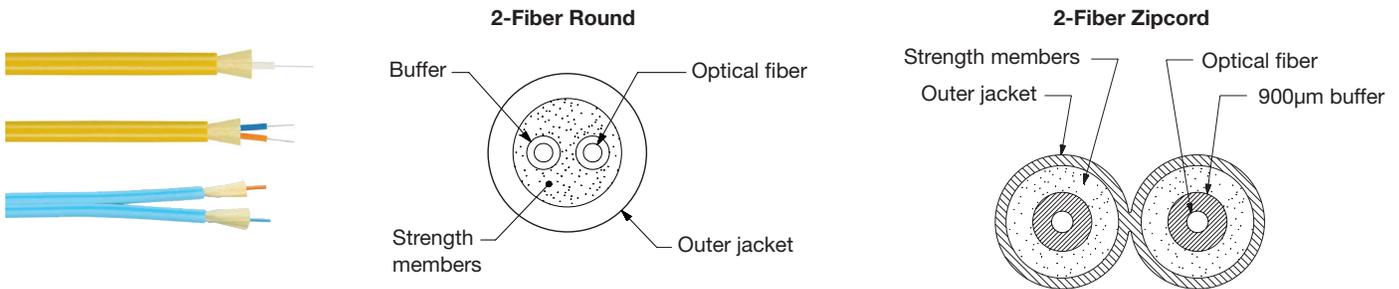

EuroClass cable for the EMEA market is LSZH cable that has been tested to more stringent standards and labeling requirements as per the EU's Construction Products Regulation. EuroClass ratings range from B2ca, the highest applicable rating for communications cable, to Fca, which is non-rated or self-declared. Each level of EuroClass cable from B2ca down to Dca are further characterized by Smoke, Flaming Droplets, and Acidity ratings. Local regulations vary on which rating can be used in which application, so it is important to understand the local requirement. Further information on Panduit's EuroClass offering is available at the [CPR landing page](#). Many of Panduit's EuroClass cables also comply with UKCA.

Non-Flame Rated

Outside Plant (OSP) cables are intended for outdoor use only. Typically, these cables are constructed using varying densities of Polyethylene (PE) in the outer jacket. Because cables without flame ratings do not contain flame suppressants and emit noxious gasses when burned, building codes often restrict the distance installers are permitted to route inside buildings before termination to 50 feet or 15 meters.

Opticore® Interconnect and PON Cables

- Indoor cable used in interconnect, horizontal installations, patch cords and routing in tight spaces
- Can be installed in cable trays and panels; supports applications including FTTH
- Bend-insensitive singlemode (ITU G.657.A1) with 1 and 2 fiber round cable for Passive Optical Networking (PON)

Premises Fibre Cables for EMEA

(Europe, Middle East, and Africa)

Opticore All-Dielectric Outside Plant Cable, Gel-Filled

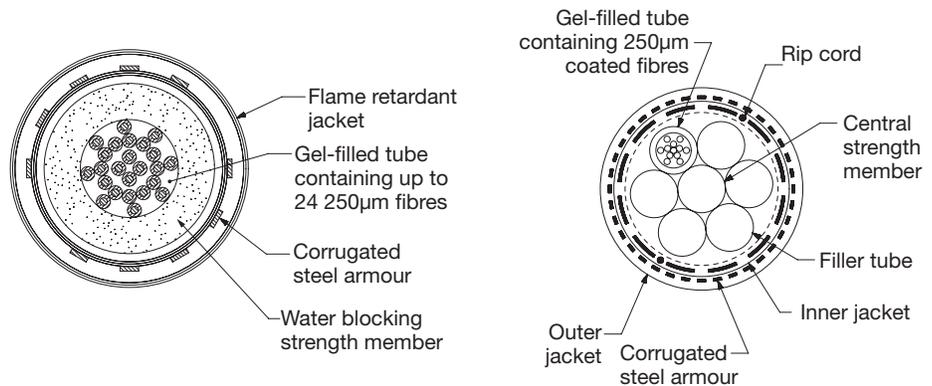

- Gel-filled water blocked loose tubes and UV resistant outer jacket
- For use in aerial (with messenger wire) and duct applications
- Non-metallic cable does not require grounding and bonding

	Central Tube		Stranded Tube			
	4-Fibre	6-Fibre	48-Fibre	72-Fibre	96-Fibre	144-Fibre

Fiber Cable Installation Accessories

Armored Cable Grounding & Bonding Kits

- Provides a secure bond to the armor sheath on indoor and indoor/outdoor fiber optic cables at both cassette and enclosure ends
- Worm-gear design evenly distributes forces across the armor, is compatible with common armor for long term reliability

Part number	Description
ACGK	Armored cable grounding kit with one grounding terminal for #6 AWG and one #10 mechanical clamp, 9/16" – 1 1/16" diameter range.
ACG24K	#6 AWG(16mm ²) jumper for armored cable diameter up to 0.84" (21.3mm); 24" (609.6mm) length; factory terminated on one end with LCC6 two-hole copper compression lug and the other end with grounding terminal; provided with two each #12-24 and M6 thread-forming screws and a Black polypropylene terminal cover
ACG24K-500	#6 AWG(16mm ²) jumper for armored cable diameter 0.85" (21.3mm) to 1.03" (26.2mm); 24" (609.6mm) length; factory terminated on one end with LCC6 two-hole copper compression lug and the other end with grounding terminal; provided with two each #12-24 and M6 thread-forming screws and a Black polypropylene terminal cover.
ACG24KX-500	#6 AWG(16mm ²) jumper for armored cable diameter 0.94" (23.9mm) to 1.5" (38.1mm); 24" (609.6mm) length; factory terminated on one end with LCC6 two-hole copper compression lug and the other end with grounding terminal; provided with two each #12-24 and M6 thread-forming screws and a Black polypropylene terminal cover.

Cable Slack Spool

- Can be mounted to 4 post racks or used in vertical building risers

Part number	Description
WMFS24	Wall Mount Fiber Spool 24" – provides proper bend radius for excess cable storage. The steel ring has many different mounting options, including wall mount or various mounting methods to 4 post racks. The ring is 24 inches in diameter. Includes hook and loop for easy cable tie-off. Product is Black.

OptiCam® Pre-Polished Cam Fiber Optic Termination Kit

- For termination of all Panduit OptiCam Pre-Polished Connectors
- OptiCam 2 Termination Tool simplifies tooling and termination by providing calculated insertion loss at the point of termination

FOCTT2-BKIT2

FOCTT2-KIT

FOCTT2-PKIT2

OptiCam® Pre-Polished and Fusion Splice Fiber Optic Connectors

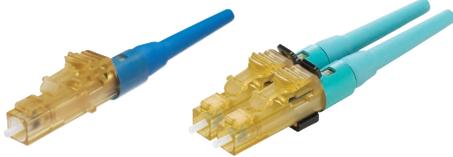

- TIA/EIA-604 FOCIS compatible connectors
- Exceed TIA/EIA-568-D.3 requirements
- Connector housing and boot colors follow TIA/EIA-568-D.3 suggested color identification scheme
- Non-optical disconnect on OptiCam Connectors maintain data transmission under tensile loads for jacketed cable
- Quick installation provides field termination in less than half the time of field polish connectors
- Patented re-termination capability on OptiCam Connectors provide yield rates approaching 100%
- Factory pre-polished fiber endface eliminates time-consuming field polishing to reduce installation costs, labor, scrap and the number of tools required
- OptiCam Cam activated fiber and buffer clamp mechanisms provide superior fiber and buffer retention – less sensitivity to fiber tensile loading

Pre-Polished Fiber Optic Kit & Connectors

OptiCam® Pre-Polished Fiber Optic Connectors

LC OptiCam® Pre-Polished Fiber Optic Connectors

• Quick installation – provides field termination in less than half the time of field polish connectors. Patented re-termination capability.

selection information

Part Number	Connector Type	Ferrule Material	Fiber	Ferrule Finish	Backbone Color	Boot Color	Average Insertion Loss**	Return Loss

Fiber Optic Termination Accessories

Part Number	Description
FSPCVR	Precision fiber optic cleave tool with rotary blade for 7mm and 10mm cleaves.connector termination.
FO6CB	The fan-out kit for six fibers is used to build up 250µm fiber to the 900µm tight-buffered coating size for connector termination.
FO12CB	The fan-out kit for twelve fibers is used to build up 250µm fiber to 900µm tight-buffered coating size for connector termination.
F250BT-C	250 micron fiber build-up tube kit, includes 100 build-up tubes and supplemental installation instructions to build up to 250µm fiber to 900µm.
FOLPC-1.25MM	1.25mm Multimode fiber optic patch cord for OCTT2 (termination tool).
FOLPC-1.25SM	1.25mm Singlemode fiber optic patch cord for OCTT2 (termination tool).
FOLPC-2.5MM	2.5mm Multimode fiber optic patch cord for use with OCTT2 (termination tool).
FOLPC-2.5SM	2.5mm Singlemode fiber optic patch cord for use with OCTT2 (termination tool).
OCTTR1.25SS	Replacement 1.25mm split sleeves for Opticam Termination Tool. 5 sleeves.
OCTTR2.5SS	Replacement 2.5mm split sleeves for Opticam Termination Tool. 5 sleeves.
FLCCLIPBL-L	LC Duplex Clip, Pack of 50, for OptiCam Connectors, Black.
