

# Product Environmental Profile

**EXW-TREND IP65 ACT/L LMR/500SA/1LFP**

## General information

Representative product	EXW-TREND IP65 ACT/L LMR/500SA/1LFP - OVA47215
Description of the product	Maintained emergency luminaire (EN 60598-2-22) luminaire in which the emergency lighting lamps are energized at all times when normal or emergency lighting is required
Functional unit	Facilitate the evacuation of personnel by providing: 500 lumens of light for one hour; 400 lumens of light for an hour and a half; 300 lumens of light for two hours; 250 lumens of light for three hours in the event of an electrical power cut. This function is provided for ten years by its self-contained power supply

## Constituent materials

Reference product mass 560 g including the product, its packaging and additional elements and accessories

Plastics	59,0%
Metals	0,0%
Others	41,0%

## Substance assessment

Products of this range are designed in conformity with the requirements of the RoHS directive (European Directive 2011/65/EU of 8 June 2011) and do not contain, or only contain in the authorised proportions, lead, mercury, cadmium, hexavalent chromium or flame retardants (polybrominated biphenyls - PBB, polybrominated diphenyl ethers - PBDE) as mentioned in the Directive

Details of ROHS and REACH substances information are available on the Schneider-Electric Green Premium website

## Additional environmental information

The EXW-TREND IP65 ACT/L LMR/500SA/1LFP presents the following relevant environmental aspects

<b>Design</b>	The small capacity of the battery and the high efficiency of the LED light source reduce the energy consumption in the installation
<b>Manufacturing</b>	Manufactured at a Schneider Electric production site ISO14001 certified
<b>Distribution</b>	Weight and volume of the packaging optimized, based on the European Union's packaging directive Packaging weight is 58,3 g, consisting of Cardboard(90%) Paper (20%) Packaging recycled materials is 80% of total packaging mass. Product distribution optimised by setting up local distribution centres
<b>Installation</b>	Wall or ceiling installations needed
<b>Use</b>	During the product service life, a battery of 97g should be changed 1 times to guarantee the rated discharge duration. The LED light source lasts 10 yeas or longer and doesn't need to be substituted.
<b>End of life</b>	End of life optimized to decrease the amount of waste and allow recovery of the product components and materials  This product contains batteries: (97g), electronic card:(50g) that should be separated from the stream of waste so as to optimize end-of-life treatment.  The location of these components and other recommendations are given in the End of Life Instruction document which is available on the Schneider-Electric Green Premium website  <a href="http://www2.schneider-electric.com/sites/corporate/en/products-services/green-premium/green-premium.page">http://www2.schneider-electric.com/sites/corporate/en/products-services/green-premium/green-premium.page</a>  Recyclability potential: <b>73%</b> Based on "ECO'DEEEE recyclability and recoverability calculation method" (version V1, 20 Sep. 2008 presented to the French Agency for Environment and Energy Management: ADEME).

## Environmental impacts

Reference life time	10 years			
Installation elements	During the installation phase, the packaging must be disposed off.			
Use scenario	The product is in active mode 1% of the time with a power consumption of 0,31W and in stand-by mode 99% of the time with a power consumption of 1,6W for 10 years.			
Geographical representativeness	Europe			
Technological representativeness	Maintained emergency luminaire (EN 60598-2-22) luminaire in which the emergency lighting lamps are energized at all times when normal or emergency lighting is required			
Energy model used	Manufacturing	Installation	Use	End of life
	Energy model used: Italy	Electricity grid mix; AC; consumption mix, at consumer; < 1kV; EU-27	Electricity grid mix; AC; consumption mix, at consumer; < 1kV; EU-27	Electricity grid mix; AC; consumption mix, at consumer; < 1kV; EU-27

\* represents less than 0.01% of the total life cycle of the reference flow

Life cycle assessment performed with EIME version EIME v5.8.1, database version 2016-11 in compliance with ISO14044.

The use phase is the life cycle phase which has the greatest impact on the majority of environmental indicators (based on compulsory indicators).

Please note that the values given above are only valid within the context specified and cannot be used directly to draw up the environmental assessment of an installation.
