Product Environmental Profile

INS250 4P 250 A - Switch Disconnector

Compact INS/INV

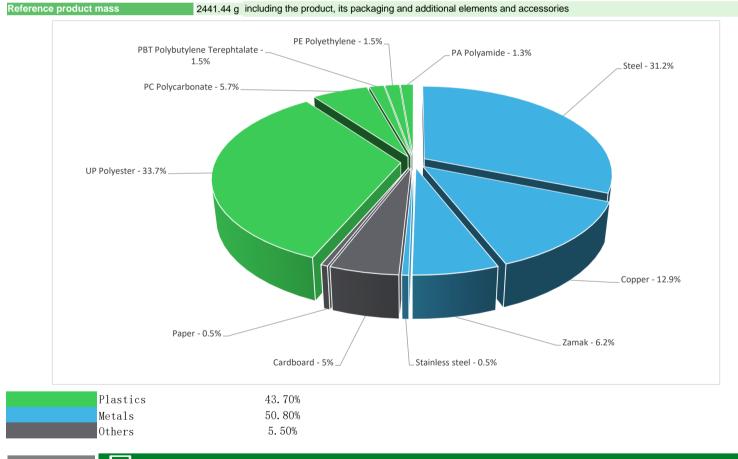

Schneider Gelectric

General information

Reference product	INS250 4P 250 A - Switch Disconnector - 31107						
Description of the product This Compact INS250 is a 4 poles non-automatic switch-disconnector with black rotary handle. It is suitable positive contact indication, as defined by IEC 60947-1 and IEC60947-3 standards. The operational current in categories AC22A and AC23A. The rated voltage is 690VAC 50/60Hz or 250VDC. The black rotary handle offer easy operation and high performance in interruption of currents.							
Description of the range	The products of the range are: Compact INS40~320 A, INV100~630 A, Interpa, INSJ400 A switch disconnector, 3P and 4P, the representative product used for analysis is Compact INS250 switch disconnector, 250 A, standard version with black rotary handle, 4 poles (31107). The environmental impacts of this reference product are representative of the impacts of the other products of the range which are developed with a similar technology.						
Functional unit	Turn off all or part of an installation by separating the installation or part of the installation of all electrical energy or earth, for safety reasons with a rated voltage U, and rated current In ensuring isolation characterised by a rated voltage Ui, and if applicable the specific specifications, according to the appropriate use scenario, and during the reference service life of the product of 20 years.						
Specifications are:	U = 250 V DC 690 V AC 50/60 Hz In = 250 A Ui 800 V AC 50/60 Hz						

Constituent materials

Substance assessment

Details of ROHS and REACH substances information are available on the Schneider-Electric Green Premium website https://www.se.com/ww/en/work/support/green-premium/

(J) Additional environmental information

```
End Of Life
```

Recyclability potential: 89%

The recyclability rate was calculated from the recycling rates of each material making up the product with the exception of data using the ESR database. For materials or components using the ESR database or the absence of data the conservative hypothesis "0% recyclability" was used.

${\mathcal O}$ Environmental impacts

Reference service life time	20 years										
Product category	Disconnectors - Low voltage										
Installation elements	The product does not require any installation oper	The product does not require any installation operations									
Use scenario	Load rate = 50 % In Use rate (closed device) = 30 % RLT										
Time representativeness	The collected data are representative of the year 2023										
Technological representativeness	The Modules of Technologies such as material production, manufacturing processes and transport technology used in the PEP analysis (LCA EIME in the case) are Similar and représentaive of the actual type of technologies used to make the product.										
Geographical representativeness	Rest of the World										
Energy model used	[A1 - A3] Electricity Mix; Low voltage; 2018; China, CN	[A5] Electricity Mix; Low voltage; 2018; China, CN	[B6] Electricity Mix; Low voltage; 2018; China, CN	[C1 - C4] Electricity Mix; Low voltage; 2018; China, CN							

Detailed results of the optional indicators mentioned in PCRed4 are available in the LCA report and on demand in a digital format - Country Customer Care Center - http://www.schneider-electric.com/contact
