

Product Environmental Profile

Acti9 - Switch Disconnecter iSW - 4P - 63 A - 415 V

Representative of all Acti9 Switch Disconnecter iSW

General information

Reference product	Acti9 - Switch Disconnecter iSW - 4P - 63 A - 415 V - A9S65463
Description of the product	This Acti9 iSW product is a modular and reliable switch disconnecter. It is a 4P, rated current is 63A, and operating voltage is 415VAC. The degree of protection is IP20 and IP40 in an enclosure. It is DIN rail mountable. The dimensions are (W) 72mm x (H) 85mm x (D) 73mm. This switch disconnecter is used for control and isolation. This product complies with EN/IEC 60947-3 standard.
Description of the range	The environmental impacts of this reference product are representative of the impacts of the other products of the range which are developed with a similar technology. The products of the range are: Representative of all Acti9 Switch Disconnecter iSW
Functional unit	Establish, support and interrupt the rated current I = 63A and rated voltage U = 415V, and if applicable the specific specifications, for an enclosure / cabinet installation, in the Household/Commercial application areas, according to the appropriate use scenario, and for the reference service life of the product of 20 years.
Specifications are:	I = Rated operating current (63A) U = Rated operating voltage (415V) Low Voltage (AC) IP20 & IP40

Constituent materials

Reference product mass	375 g	including the product, its packaging, additional elements and accessories
------------------------	-------	---------------------------------------------------------------------------

Plastics	46,2%
Metals	48,4%
Others	5,4%

Substance assessment

Details of ROHS and REACH substances information are available on the Schneider-Electric website
<https://www.se.com>

**Additional environmental information**

End Of Life	Recyclability potential:	50%	The recyclability rate was calculated from the recycling rates of each material making up the product based on REEECYLAB tool developed by Ecosystem, for components/materials not covered by the tool, data from the EIME database and the related PSR was taken. If no data was found a conservative assumption was used (0% recyclability).
-------------	--------------------------	------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

**Environmental impacts**

Reference service life time	20 years		
Product category	Switches - Enclosure / cabinet - Household / Commercial		
Life cycle of the product	The manufacturing, the distribution, the installation, the use and the end of life were taken into consideration in this study		
Electricity consumption	The electricity consumed during manufacturing processes is considered for each part of the product individually, the final assembly generates a negligible consumption		
Installation elements	The product does not require any installation operations		
Use scenario	Load rate = 20 % of 63A (I) Use rate = 30% of 20 years (RLT)		
Time representativeness	The collected data are representative of the year 2025		
Technological representativeness	The Modules of Technologies such as material production, manufacturing processes and transport technology used in the PEP analysis (LCA EIME in the case) are Similar and representative of the actual type of technologies used to make the product.		
Geographical representativeness	Final assembly site	Use phase	
	Europe	Europe	
Energy model used	[A1 - A3]	[A5]	[B6]
	Electricity Mix; Low voltage; 2020; Hungary, HU	No energy used	Electricity Mix; Low voltage; 2020; Europe, EU-27
			[C1 - C4]
			Global, European and French datasets are used.

Detailed results of the optional indicators mentioned in PCRed4 are available in the LCA report and on demand in a digital format - Country Customer Care Center - <http://www.se.com/contact>

Mandatory Indicators		Acti9 - Switch Disconnecter iSW - 4P - 63 A - 415 V - A9S65463						
Impact indicators	Unit	Total (without Module D)	[A1 - A3] - Manufacturing	[A4] - Distribution	[A5] - Installation	[B1 - B7] - Use	[C1 - C4] - End of life	[D] - Benefits and loads

Life cycle assessment performed with EIME version v6.2.2, database version 2024-01 in compliance with ISO14044, EF3,1 method is applied, for biogenic carbon storage, assessment methodology -1/1 is used

According to this environmental analysis, proportionality rules may be used to evaluate the impacts of other products of this range, ratios to apply can be provided upon request

Please note that the values given above are only valid within the context specified and cannot be used directly to draw up the environmental assessment of an installation.

Registration number :	SCHN-01376-V01.01-EN	Drafting rules	PCR-4-ed4-EN-2021 09 06
		Supplemented by	PSR-0005-ed3.1-EN-2023 12 08
Verifier accreditation N°	VH48	Information and reference documents	www.pep-ecopassport.org
Date of issue	03-2025	Validity period	5 years
Independent verification of the declaration and data, in compliance with ISO 14025 : 2006			
Internal External X			
The PCR review was conducted by a panel of experts chaired by Julie Orgelet (DDemain)			
PEPs are compliant with XP C08-100-1:2016 and EN 50693:2019 or NF E38-500 :2022			
The components of the present PEP may not be compared with components from any other program.			
Document complies with ISO 14025:2006 "Environmental labels and declarations. Type III environmental declarations"
