

# Product Environmental Profile

## SPACELOGIC KNX VALVE DRIVE CONTROLLER

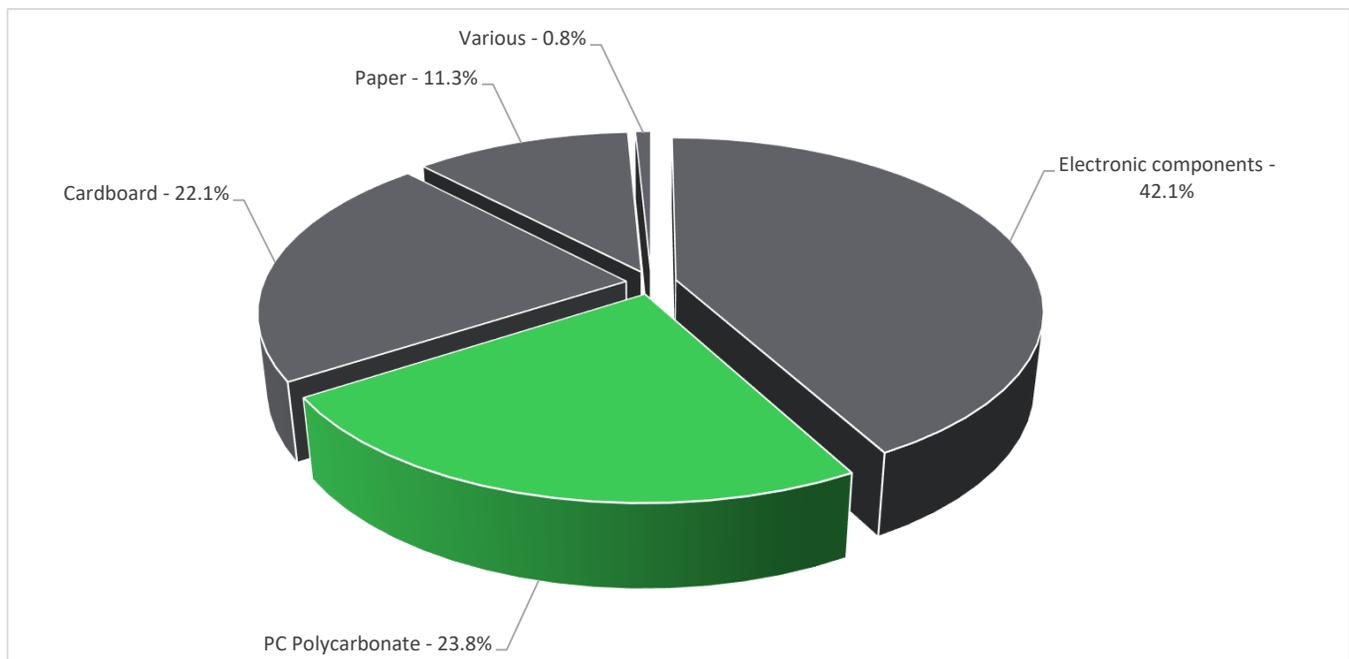

## General information

<b>Representative product</b>	SPACELOGIC KNX VALVE DRIVE CONTROLLER - MTN6730-0002
<b>Description of the product</b>	The main function of SpaceLogic KNX Valve Drive Controller is to actuate thermoelectric valve drives for heating or cooling ceilings.
<b>Functional unit</b>	The device actuates switching of electrothermal actuators for heaters or cooling ceilings. Switch-on and Switch-off during the drive's cycle time achieves an almost constant behaviour. Integrate room temperature control with setpoint value specification. It has six independent controllers to control up to six independent rooms. Installation in sub-distribution units on DIN rail according to EN 60715 for 10 years.

## Constituent materials

<b>Reference product mass</b>	335 g including the product, its packaging.
-------------------------------	---

	Plastics	23.8%
	Metals	0.0%
	Others	76.3%

## Substance assessment

Products of this range are designed in conformity with the requirements of the RoHS directive (European Directive 2011/65/EU of 2 January 2013, amended in March 2015, 2015/863/EU and in November 2017, 2017/2102/EU) and do not contain, or only contain in the authorised proportions, lead, mercury, cadmium, hexavalent chromium or flame retardants (polybrominated biphenyls - PBB, polybrominated diphenyl ethers – PBDE), Bis (2-ethylhexyl)phthalate - DEHP, Benzyl butyl phthalate– BBP, Dibutyl phthalate - DBP, Diisobutyl phthalate - DIBP) as mentioned in the Directive.

Details of ROHS and REACH substances information are available on the Schneider-Electric Green Premium website

<http://www2.schneider-electric.com/sites/corporate/en/products-services/green-premium/green-premium.page>

## Additional environmental information

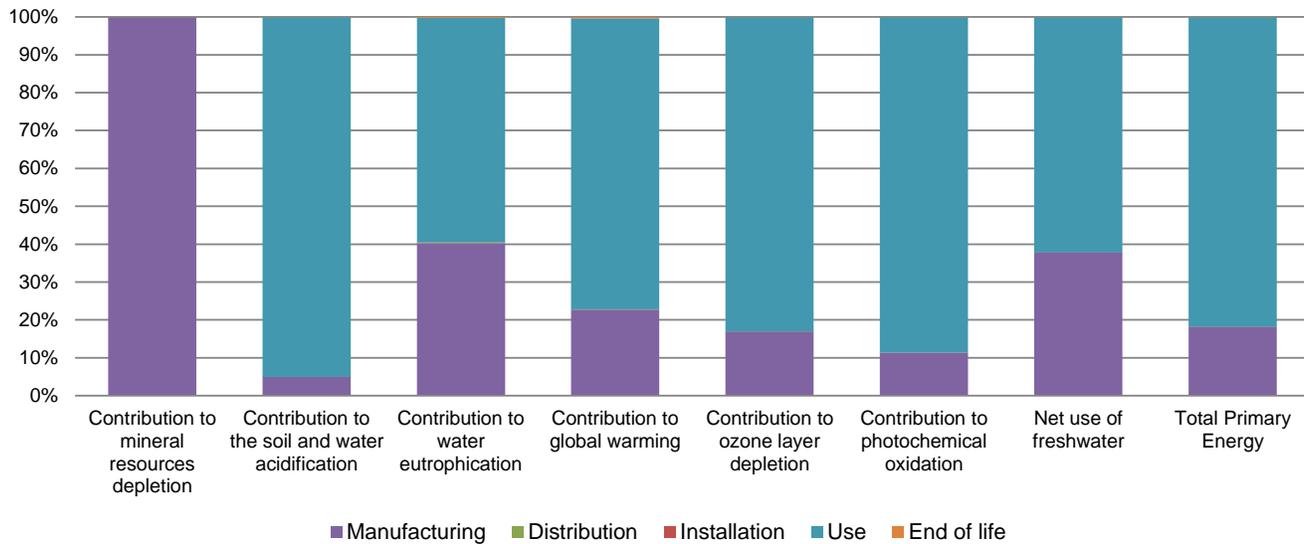

The SPACELOGIC KNX VALVE DRIVE CONTROLLER presents the following relevant environmental aspects

<b>Manufacturing</b>	Manufactured at a Schneider Electric production site ISO14001 certified
<b>Distribution</b>	Weight and volume of the packaging optimized, based on the European Union's packaging directive Packaging weight is 110 g, consisting of cardboard (66.18%), paper (33.82%) Product distribution optimised by setting up local distribution centres
<b>Installation</b>	The product does not require special installation procedure and requires little to no energy to install. The disposal of the packaging materials are accounted during the installation phase (including transport to disposal).
<b>Use</b>	The product does not require special maintenance operations.
<b>End of life</b>	End of life optimized to decrease the amount of waste and allow recovery of the product components and materials  This product contains electronic card (137g) that should be separated from the stream of waste so as to optimize end-of-life treatment.  The location of these components and other recommendations are given in the End of Life Instruction document which is available on the Schneider-Electric Green Premium website  <a href="http://www2.schneider-electric.com/sites/corporate/en/products-services/green-premium/green-premium.page">http://www2.schneider-electric.com/sites/corporate/en/products-services/green-premium/green-premium.page</a>  Recyclability potential: <b>11%</b> Based on "ECO'DEEE recyclability and recoverability calculation method" (version V1, 20 Sep. 2008 presented to the French Agency for Environment and Energy Management: ADEME).

## Environmental impacts

<b>Reference life time</b>	10 years		
<b>Product category</b>	Other equipments - Active product		
<b>Installation elements</b>	No special components needed		
<b>Use scenario</b>	The product is in active mode 100% of the time with a power use of 1 W for 10 years		
<b>Geographical representativeness</b>	Europe and Middle east asia		
<b>Technological representativeness</b>	The Modules of Technologies such as material production, manufacturing process and transport technology used in this PEP analysis (LCA-EIME in this case) are Similar and representative of the actual type of technologies used to make the product in production.		
<b>Energy model used</b>	<b>Manufacturing</b>	<b>Installation</b>	<b>Use</b>
	Manufacturing plant: INSTA, Hohe Steinert, Germany	Electricity Mix; AC; consumption mix, at consumer; < 1kV; EU-27	Electricity Mix; AC; consumption mix, at consumer; < 1kV; EU-27
			<b>End of life</b> Electricity Mix; AC; consumption mix, at consumer; < 1kV; EU-27

Compulsory indicators		SPACELOGIC KNX VALVE DRIVE CONTROLLER - MTN6730-0002					
Impact indicators	Unit	Total	Manufacturing	Distribution	Installation	Use	End of Life

\* represents less than 0.01% of the total life cycle of the reference flow

Life cycle assessment performed with EIME version EIME v5.8.1, database version 2016-11 in compliance with ISO14044.

The use phase is the life cycle phase which has the greatest impact on the majority of environmental indicators (based on compulsory indicators) except one indicator ADPe is mostly in Manufacturing phase.

Please note that the values given above are only valid within the context specified and cannot be used directly to draw up the environmental assessment of an installation.
