## General information

Reference product	Harmony ZB5R Transmitter - ZB5RTA3
Description of the product	This is a wireless and batteryless transmitter pushbutton. It functions as a wireless transmitter that sends a signal when button is pressed in industrial applications. The device operates without batteries and it's generates own energy through the mechanical action of pressing the button.
Description of the range	Single product
Functional unit	This transmitter is part of the Harmony XB5R (plastic) and XB4R (metal) ranges of wireless and batteryless pushbuttons. It features a transmitter that operates without batteries or wiring, sending a single radio frame each time the button is pressed. The device communicates using the Zigbee Green Power protocol at 2.4 GHz, in compliance with IEEE 802.15.4 standard. The pushbutton has a response time of less than 2 milliseconds and can operate over distances of up to 100 meters in open fields or up to 300 meters with a relay antenna during 10 years of lifetime.

## Additional environmental information

End Of Life	Recyclability potential:	13%	The recyclability rate was calculated from the recycling rates of each material making up the product based on REEECYLAB tool developed by Ecosystem, for components/materials not covered by the tool, data from the EIME database and the related PSR was taken. If no data was found a conservative assumption was used (0% recyclability).
