## Purpose

The product family must be disposed according to the legislation of the country. This document is intended for use by end of life recyclers or treatment facilities. It provides the basic information to assure an appropriate end of life treatment for the components and materials of the product.

## Operations recommended for the end of life treatment

There are several steps to process the products at the end of life so as to recover components, materials or energy :

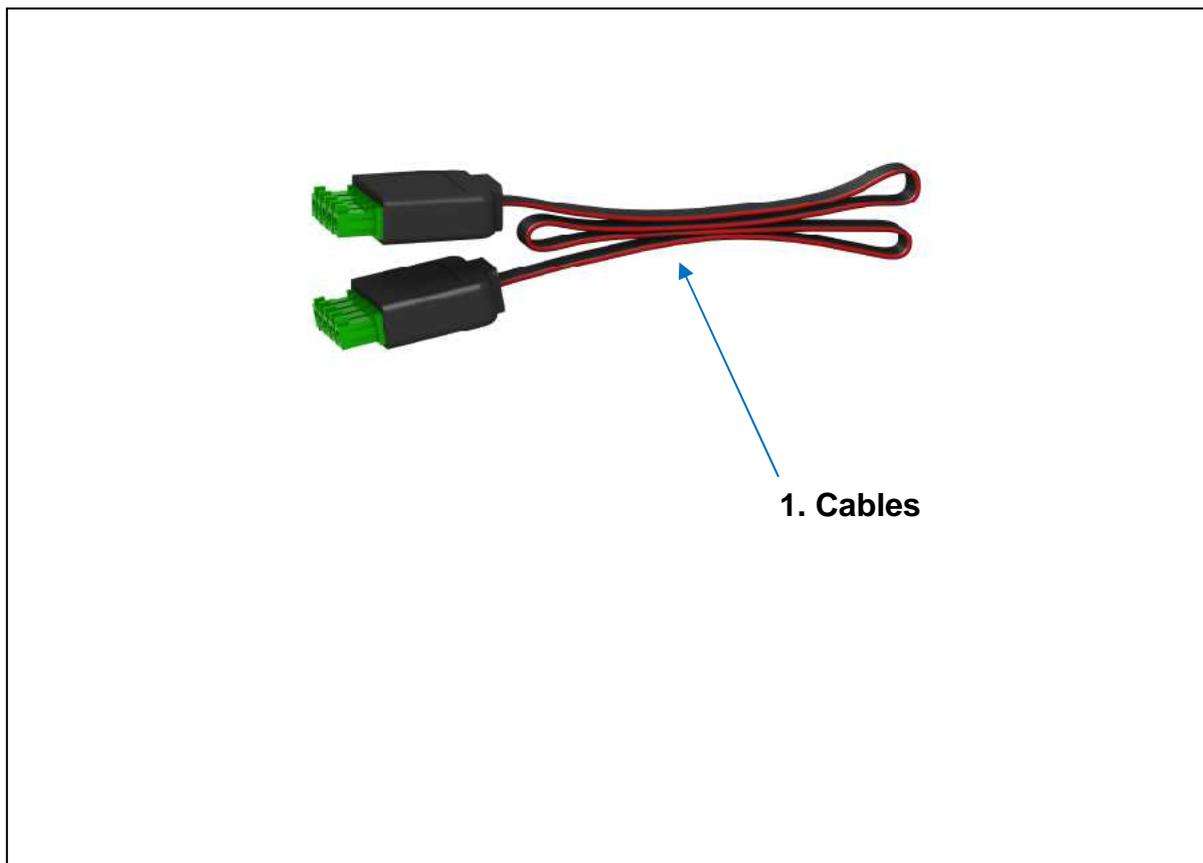

**Reuse → Separation for special treatment → Other dismantling → Shredding**

**CAUTION:** Impacts of the end of life treatment (grinding, separation, recycling of metals, land filling of other materials) were considered using the EIME dataset related to Waste treatment of cables.

**Metals need to separate from plastics, and metals and plastic are recycled, while the others are landfilled.**
