

Product End of Life Instructions

EcoStruxure I/O Smart Link

Potential disassembly risks

⚠ WARNING

HAZARD OF ELECTRIC SHOCK, EXPLOSION, OR ARC FLASH

- Only qualified workers should install this equipment. Such work should be performed only after reading this entire set of instructions.
- NEVER work alone.
- Apply appropriate personal protective equipment (PPE) and follow safe electrical practices.
- Turn off all power supplying the equipment in which I/O Smart Link is to be installed before installing and wiring I/O Smart Link.
- Always use a properly rated voltage sensing device to confirm that power is off.
- Beware of potential hazards, and carefully inspect the work area for tools and objects that may have been left inside the equipment.

Failure to follow these instructions will result in death or serious injury.

End of Life Instructions

Recommendation	Number on drawing	Component / Material	Weight (in g)	Comment
To be depolluted	1	Electronic Board (Communication) > 10cm ²	109.63	

Product description

Manufacturer identification	Schneider Electric Industries SAS
Brand name	Schneider Electric
Product function	EcoStruxure I/O Smart Link Modbus is a slave intelligent communication module with 11 channels. It is used to connect final distribution boards to any supervision system.
Product reference	A9XMSB11
Total representative product mass	188 g
Representative product dimensions	H 22.5mm x L 359mm x D 42mm
Accessories	Power supply connector, Modbus communication connector, and locking clips
Date of information release	9/1/2024

Additional information

Legal information	This product family is in the scope of European Union directive 2012/19/EU on Waste Electrical and Electronic Equipment (WEEE). The product family must be disposed according to the legislation of the country. This document is intended for use by end of life recyclers or treatment facilities. It provides the basic information to assure an appropriate end of life treatment for the components and materials of the product.	
Recyclability potential	0%	Recyclability rate has been calculated based on REEECY'LAB tool developed by Ecosystem, for components/materials not covered by the tool, data from the "ECO'DEEE recyclability and recoverability calculation method" was taken. If no data was found a conservative assumption was used (0% recyclability).
