Product End of Life Instructions

TeSys Tera - Motor Management Profibus DP 100-240V AC/DC

Potential disassembly risks

HAZARD OF PARTS EJECTION OR HAND CRUSHING

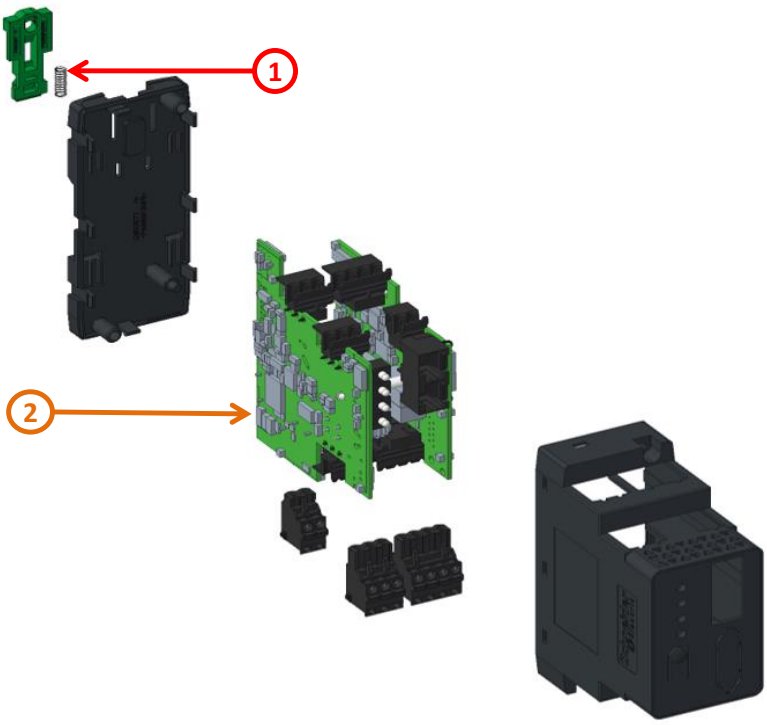
- Switch the Manual Transfer Switch to OFF state before disassembly.
- Observe Instructions to disassemble the spring.
- This product contains a **mechanism with spring loaded**, which are recommended to be treated separately during the End of Life operations.

HAZARD OF ELECTRIC SHOCK, EXPLOSION OR ARC FLASH

- Apply appropriate personal protective equipment (PPE) and follow safe electrical work practices. See NFPA 70E.
- This equipment must be installed and serviced only by qualified electrical personnel.
- Turn off all power supplying this equipment before working on or inside equipment.
- Always use a properly rated voltage sensing device to confirm power is off.
- There are several steps to process the products at the end of life so as to recover components, materials or energy

Failure to follow these instructions will result in death or serious injury.

End of Life Instructions



Recommendation	Number on drawing	Component / Material	Weight (in g)	Comment
Potential hazards	1	Push-to-Trip Spring	0.3	Comprssion Spring
To be depolluted	2	Electronic Board (Communication)	217.48	Electronic PCBAs

Product description

Manufacturer identification	Schneider Electric Industries SAS
Brand name	Schneider Electric
Product function	TeSys Tera motor management profibus DP is a motor controller unit used for motor management and protection having 4 Digital Input and 3 Digital output modules with operational voltage 100-240V AC/DC supply. It Confirms to IEC 60947-4-1 standard.
Product reference	LTMTPFM
Total representative product mass	293 g
Representative product dimensions	45mm x 112mm x 90mm
Accessories	No
Date of information release	03-2025

Additional information

Legal information	This product family is in the scope of European Union directive 2012/19/EU on Waste Electrical and Electronic Equipment (WEEE). The product family must be disposed according to the legislation of the country. This document is intended for use by end of life recyclers or treatment facilities. It provides the basic information to assure an appropriate end of life treatment for the components and materials of the product.	
In case of special transportation: transportation method	No	
Recyclability potential	**0%**	The recyclability rate was calculated from the recycling rates of each material making up the product based on REEECY'LAB tool developed by Ecosystem, for components/materials not covered by the tool, data from the EIME database and the related PSR was taken. If no data was found a conservative assumption was used (0% recyclability).
