

## Giunto per triangoli a 60° (fissaggio interno)

EO 111 0000

Lunghezza: 0

Finiture

73 Inox AISI 430 - UNI EN 10088

## Caratteristiche Tecniche

Spessore

[mm] 4,00

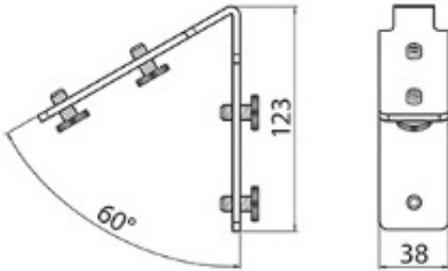

Peso

[Kg] 0,335

## Giunto per triangoli a 60° (fissaggio interno)

## Montaggio

*N.4 special pins (Geomet) included, M8x30 with Allen spanner coupler*

The element is ready for composition at fixed degree but it is a sliding system inside the section itself (1). The possibility of tightening using an Allen spanner (2) significantly speeds up assembly and neither bolts nor nuts, nor various locking system protrude from the sections themselves (3). This provides a continuous base without rough spots or elements outside the profiles (4).

(4) It can be used together with the variable angle joint, code E0 091
